INDEX TO AUTHORS.

A

Allin, Kathleen Drew. See HARDING, ALLIN, and VAN WYCK, 61

B

Balls, A. K., and **Brown, J. B.** Studies in yeast metabolism. I, 789

—. See BROWN and BALLS, 823

Bergeim, Olaf. Intestinal chemistry. I. The estimation of intestinal reductions, 45

—. II. Intestinal reductions as measures of intestinal putrefaction, with some observations on the influence of diet, 49

Black, Archie. See STEENBOCK, NELSON, and BLACK, 275

Bock, A. V., and **Field, H., Jr.** The carbon dioxide equilibrium in alveolar air and arterial blood, 269

Bock, Joseph C. See GILBERT and BOCK, 361

Borsook, Henry, and **Wasteneys, Hardolph.** The enzymatic synthesis of protein. II. The effect of temperature on the synthesizing action of pepsin, 633

—. See WASTENEYS and BORSOOK, 1, 15, 675

Bradley, H. C. See HERTZMAN and BRADLEY, 231

Brown, J. B., and **Balls, A. K.** Studies in yeast metabolism. II. Carbon dioxide and alcohol, 823

—. See BALLS and BROWN, 789

Brunquist, E. H., Schneller, E. J., and **Loevenhart, A. S.** The effects of anoxemia on nitrogen metabolism, 93

C

Cerecedo, Leopold R., and **Sherwin, Carl P.** Comparative metabolism of certain aromatic acids. VII. Fate of *p*-chloro, *p*-bromo, and *p*-amino acids in the dog, the rabbit, and man. 217

Chibnall, Albert Charles, and **Nolan, Laurence S.** A protein from the leaves of the alfalfa plant, 173

— and —. A protein from the leaves of *Zea mays*, 179

Conant, James B., and **Fieser, Louis F.** Methemoglobin, 595

— and —. A method for determining methemoglobin in the presence of its cleavage products, 623

D

Daschavsky, P. G. See JOHNSON and DASCHAVSKY, 725

Day, Harold A. See YOUNGBURG and PUCHER, 31

XUM

E

Eckstein, Henry C. Fat absorption through channels other than the left thoracic duct, 737

—. Synthesis of lecithin in the animal organism, 743

Elvehjem, C. A. See HART, STEENBOCK, and ELVEHJEM, 117

F

Falk, K. George, Noyes, Helen Miller, and **Sugiura, Kanematsu.** Studies on enzyme action. XXX. A comparative study of the characteristic lipase actions of the tissues of different animals and of some human tissues, 697

—. See NOYES and FALK, 687

Field, H., Jr. See BOCK and FIELD, 269

Fieser, Louis F. See CONANT and FIESER, 595, 623

Fridericia, L. S. Inactivating action of some fats on vitamin A in other fats, 471

G

Gersdorff, C. E. F. See JONES, GERSDORFF, and MOELLER, 183

Gilbert, Max, and **Bock, Joseph C.** On the determination of sugar in small amounts of blood, 361

Gittleman, I. See KRAMER and GITTLEMAN, 353

Greenwald, Isidor, Gross, Joseph, and **Samet, Jerome.** The nature of the sugar in normal urine. II. The sugar excretion upon various diets and the influence of diet upon glucose tolerance with some remarks on the nature of the action of insulin, 401

—, **Samet, Jerome,** and **Gross, Joseph.** The nature of the sugar in normal urine. I. A comparison of the glucose equivalent of various sugars in different methods for the determination of glucose, 397

Gross, Joseph. See GREENWALD, GROSS, and SAMET, 401

—. See GREENWALD, SAMET, and GROSS, 397

H

Harding, Victor John, Allin, Kathleen Drew, and **Van Wyck, H. B.** The influence of sodium chloride upon the level of blood uric acid, 61

Hart, E. B., Steenbock, H., and **Elvehjem, C. A.** Dietary factors influencing calcium assimilation. V. The effect of light upon calcium and phosphorus equilibrium in mature lactating animals, 117

—, —, **Humphrey, G. C.,** and **Hulce, R. S.** New observations and a reinterpretation of old observations on the nutritive value of the wheat plant, 315

Hertzman, A. B., and **Bradley, H. C.** Studies of autolysis. XIII. The kinetics of the autolytic mechanism, 231

Hess, Alfred F., and **Weinstock, Mildred.** Antirachitic properties imparted to inert fluids and to green vegetables by ultra-violet irradiation, 301

Hess, J. S. See BRUNQUIST, SCHNELLER, and LOEVENHART, 93

Holbøll, Svend Aage. See LUNDSGAARD and HOLBØLL, 453

Howe, Paul E., and **Sanderson, Everett S.** Variations in the concentration of the globulin and albumin fractions of the blood plasma of young calves and a cow following the injection of *Bacillus abortus*. Variations in the concentration of the protein fractions of the blood plasma of pregnant and non-pregnant cows or of cows which have aborted, 767

Hulce, R. S. See HART, STEENBOCK, HUMPHREY, and HULCE, 315

Humphrey, G. C. See HART, STEENBOCK, HUMPHREY, and HULCE, 315

Hunter, Andrew, and **Smith, Ralph G.** The liberation of ammonia in tryptic digestion, 649

J

Johnson, Treat B., and **Daschavsky, P. G.** Researches on amines. X. The formation of tyramine by decarboxylation of tyrosine produced from silk, 725

— and —. Researches on proteins. VIII. The destructive distillation of the fibroin of silk, 197

Jones, D. Breese, Gersdorff, C. E. F., and **Moeller, O.** The tryptophane and cystine content of various proteins, 183

Jones, Walter, and **Perkins, M. E.** The nitrogenous groups of plant nucleic acid, 557

— and —. The occurrence of plant nucleotides in animal tissues, 291

K

Kahlenberg, Louis. On the passage of boric acid through the skin by osmosis, 149

Keenan, George L. The optical properties of some amino acids, 163

Koehler, Alfred E. The acidosis of operative anesthesia, 435

Kramer, Benjamin, and **Gittleman, I.** An iodometric method for the determination of sodium in small amounts of serum, 353

L

Levene, P. A., and **Rolf, Ida P.** Plant phosphatides. I. Lecithin and cephalin of the soy bean, 759

— and **Simms, H. S.** The relation of chemical structure to the rate of hydrolysis of peptides. II. Hydrolysis with enzyme (erepsin), 711

Levine, Victor E. A critical study of the Jendrassik reaction for water-soluble B, 157

XUM

Lewis, Howard B. See McGinty, Lewis, and Marvel, 75

Loevenhart, A. S. See Brunquist, Schneller, and Loevenhart, 93

Lundsgaard, Christen, and **Holboll, Svend Aage.** Effect of insulin and muscle tissue on glucose *in vitro*, 453

M

McGary, L. See Brunquist, Schneller, and Loevenhart, 93

McGinty, Daniel A., Lewis, Howard B., and **Marvel, Carl S.** Amino acid synthesis in the animal organism. The availability of some caproic acid derivaties for the synthesis of lysine, 75

McKenzie, Alex., and **Tudhope, Thomas Martin Aitken.** Experiments on the Walden inversion. Part XI. Substitution by halogen of the hydroxyl group in the secondary octyl alcohols, 551

Marvel, Carl S. See McGinty, Lewis, and Marvel, 75

Miller, H. G., and **Yates, W. W.** The relation of natural foodstuffs and their treatment on growth and reproduction, 259

Moeller, O. See Jones, Gersdorff, and Moeller, 183

N

Nelson, E. M., and **Steenbock, H.** Fat-soluble vitamins. XXI. Observations bearing on the alleged induction of growth-promoting properties in air by irradiation with ultra-violet light, 575

Nelson, J. M., and **Sottery, C. Theodore.** Influence of glucose and fructose on the rate of hydrolysis of sucrose by invertase from honey, 139

Nelson, Mariana T. See Steenbock and Nelson, 209

—. See Steenbock, Nelson, and Black, 275

Noback, Charles V. See Sumner, 287

Nolan, Laurence S. See Chibnall and Nolan, 173, 179

Noyes, Helen Miller, and **Falk, K. George.** Studies on enzyme action. XXIX. Comparative lipase actions of different rabbit tissues, 687

—. See Falk, Noyes, and Sugiura, 697

P

Perkins, M. E. See Jones and Perkins, 291, 557

Pucher, George W. See Youngburg and Pucher, 31

R

Rabinowitch, I. M. On the action of thyroxin, 245

—. On the relative proportions of sodium, potassium, calcium, and magnesium in blood plasma in renal disease, 667

Read, Bernard E. Metabolism studies with chaulmoogra oil.

I. The influence of chaulmoogra oil on calcium metabolism, 515
—. II. The influence of the hydnocarpates upon urinary nitrogen partition in the dog, 541
Robson, William. The metabolism of tryptophane. I. The synthesis of racemic Bz-3-methyltryptophane, 495
Rolf, Ida P. See LEVENE and ROLF, 759

S

Yates, W. W. See Miller and Yates, 259
Youngburg, Guy E., and **Pucher, George W.** Analytical methods and observations on the organic phosphorus of the urine, 31

INDEX TO SUBJECTS.

A

Abortus:
Bacillus, albumin of blood plasma following injection (HOWE and SANDERSON) 767
—, globulin of blood plasma following injection (HOWE and SANDERSON) 767

Acidosis:
Anesthesia (KOEHLER) 435

Albumin:
Blood plasma following injection of *Bacillus abortus* (HOWE and SANDERSON) 767

Alcohol:
Carbon dioxide and (BROWN and BALLS) 823
Octyl. *See* Octyl alcohol.

Alfalfa:
Protein (CHIBNALL and NOLAN) 173

Alveolar air:
Carbon dioxide equilibrium (BOCK and FIELD) 269

Amine:
Tyramine by decarboxylation of tyrosine from silk (JOHNSON and DASCHAVSKY) 725

Amino acid(s):
Optical properties (KEENAN) 163
Synthesis in animal organism (MCGINTY, LEWIS, and MARVEL) 75

***p*-Amino acids:**
(CERECEDO and SHERWIN) 217

Ammonia:
Trypsin digestion, liberation in (HUNTER and SMITH) 649

Anesthesia:
Acidosis (KOEHLER) 435

Anoxemia:
Nitrogen metabolism, effects on (BRUNQUIST, SCHNELLER, and LOEVENHART) 93

Aromatic acids:
Metabolism (CERECEDO and SHERWIN) 217

Artery:
Blood, carbon dioxide content (STEWART) 641
—, oxygen content (STEWART) 641

Autolysis:
Kinetics of autolytic mechanism (HERTZMAN and BRADLEY) 231

B

Bacillus:
abortus, albumin of blood plasma following injection (HOWE and SANDERSON) 767
—, globulin of blood plasma following injection (HOWE and SANDERSON) 767

Blood:
Arterial, carbon dioxide content (STEWART) 641
—, — — equilibrium (BOCK and FIELD) 269
—, oxygen content (STEWART) 641
Lipoid phosphorus (WHITEHORN) 133
Sodium benzoate ingestion, effect of, on (SWANSON) 565
Sugar (GILBERT and BOCK) 361
Uric acid level, influence of sodium chloride (HARDING, ALLIN, and VAN WYCK) 61
Venous, mixed, carbon dioxide content (STEWART) 641
—, —, oxygen content (STEWART) 641

Boric acid:
Passage through skin by osmosis (KAHLENBERG) 149

***p*-Bromo acids:**
(CERECEDO and SHERWIN) 217

Butter fat:
Sulfuric acid reaction (SJÖRSLEV) 487
Vitamin A-containing, disappearance of sulfuric acid reaction through action of oxidized fat from (SJÖRSLEV) 487

C

Calcification:
Rickets-producing ration, calcifying properties induced by radiant energy (STEENBOCK and NELSON) 209

Calcium:
Assimilation, diet influencing (HART, STEENBOCK, and ELVEHJEM) 117
Blood plasma in renal disease (RABINOWITCH) 667
Equilibrium in mature lactating goats, effect of light (HART, STEENBOCK, and ELVEHJEM) 117
Metabolism, influence of chaulmoogra oil (READ) 515

Caproic acid:
Derivatives, availability for synthesis of lysine (McGINTY, LEWIS, and MARVEL) 75

Carbon dioxide:
Alcohol and (BROWN and BALLS) 823
Arterial blood (STEWART) 641
Equilibrium in alveolar air (BOCK and FIELD) 269
Venous blood, mixed (STEWART) 641

Cephalin:
Soy bean (LEVENE and ROLF) 759

Chaulmoogra oil:
Calcium metabolism, influence on (READ) 515
Metabolism (READ) 515, 541

***p*-Chloro acids:**
(CERECEDO and SHERWIN) 217

Cleavage products:
Methemoglobin, method for determination, in presence of (CONANT and FIESER) 623
Cystine:
Proteins (JONES, GERSDORFF, and MOELLER) 183

D

Diabetes:
Sugar in urine, estimation with dinitrosalicylic acid (SUMNER) 287
Dinitrosalicylic acid:
Sugar in diabetic urine (SUMNER) 287
Dioxide:
Carbon. *See* Carbon dioxide.

E

Enzyme:
Hydrolysis (LEVENE and SIMMS) 711
Lipase (FALK, NOYES, and SUGIURA) 697
— (NOYES and FALK) 687
Protein, enzymatic synthesis (BORSOOK and WASTENEYS) 633
—, — — (WASTENEYS and BORSOOK) 675
Equilibrium:
Carbon dioxide, in alveolar air (BOCK and FIELD) 269
— —, — arterial blood (BOCK and FIELD) 269
Erepsin:
Hydrolysis (LEVENE and SIMMS) 711
Ethereal extracts:
Vitamin E (reproductive dietary complex) of yellow corn, wheat embryo, and hemp-seed (SURE) 371

F

Fat(s):
Absorption through channels other than left thoracic duct (ECKSTEIN) 737
Oxidized, disappearance of sulfuric acid reaction from vitamin A-containing butter fat (SJÖRSLEV) 487
Vitamin A of fats, inactivating action on other fats (FRIDERICIA) 471
Fetus:
Surface area (SANDIFORD) 323
Fibroin:
Silk, distillation (JOHNSON and DASCHAVSKY) 197
Foodstuffs:
Natural, relation to growth and reproduction (MILLER and YATES) 259
Fructose:
Sucrose hydrolysis by invertase from honey, influenced by (NELSON and SOTTERY) 139

G

Globulin:
Blood plasma following injection of *Bacillus abortus* (HOWE and SANDERSON) 767

Glucose:
Equivalent of sugars, comparison in different methods for determination of glucose (GREENWALD, SAMET, and GROSS) 397
Insulin, effect of, on (LUNDSGAARD and HOLBØLL) 453
Muscle tissue, effect of, on (LUNDSGAARD and HOLBØLL) 453
Sucrose hydrolysis by invertase from honey, influenced by (NELSON and SOTTERY) 139
Tolerance, influence of diet (GREENWALD, GROSS, and SAMET) 401
Glycine:
Synthesis in the body (SWANSON) 565

H

Halogen:
Hydroxyl group, substitution in secondary octyl alcohols of, by (McKENZIE and TUDHOPE) 551
Honey:
Invertase, influence of fructose on hydrolysis of sucrose (NELSON and SOTTERY) 139
—, — — glucose on hydrolysis of sucrose (NELSON and SOTTERY) 139
Hydnocarpates:
Urinary nitrogen partition, influence on (READ) 541
Hydrogen ion:
Concentration, effect on peptic synthesis (WASTENEYS and BORSOOK) 675
Hydrolysates:
Protein, fractional analysis (WASTENEYS and BORSOOK) 1
Hydrolysis:
Enzyme (erepsin) (LEVENE and SIMMS) 711
Peptides, rate, relation of chemical structure (LEVENE and SIMMS) 711
Sucrose, by invertase from honey, influenced by fructose (NELSON and SOTTERY) 139
—, — — from honey, influenced by glucose (NELSON and SOTTERY) 139
Hydroxyl group:
Halogen in secondary octyl alcohols (McKENZIE and TUDHOPE) 551

I

Insulin:
(GREENWALD, GROSS, and SAMET) 401
Glucose, effect on (LUNDSGAARD and HOLBØLL) 453
Intestine:
Chemistry (BERGEIM) 45, 49
Putrefaction, intestine reductions as measures (BERGEIM) 49
Reductions (BERGEIM) 45
— as measures of intestinal putrefaction (BERGEIM) 49

Intestine—*continued:*
Reductions, influence of diet (BERGEIM) 49

Invertase:
Honey, influence of fructose on hydrolysis of sucrose (NELSON and SOTTERY) 139
—, — — glucose on hydrolysis of sucrose (NELSON and SOTTERY) 139

Iodometry:
Sodium in serum (KRAMER and GITTLEMAN) 353

Irradiation:
Ultra-violet, antirachitic properties imparted to inert fluids and green vegetables (HESS and WEINSTOCK) 301
— light, growth-promoting properties in air induced (NELSON and STEENBOCK) 575

J

Jendrassik reaction:
Water-soluble B (LEVINE) 157

K

Kidney:
Disease, calcium in blood plasma (RABINOWITCH) 667
—, magnesium in blood plasma (RABINOWITCH) 667
—, potassium in blood plasma (RABINOWITCH) 667
—, sodium in blood plasma (RABINOWITCH) 667

Kinetics:
Autolytic mechanism (HERTZMAN and BRADLEY) 231

L

Lecithin:
Soy bean (LEVENE and ROLF) 759
Synthesis in animal organism (ECKSTEIN) 743

Light:
Calcium equilibrium in mature lactating goats, effect on (HART, STEENBOCK, and ELVEHJEM) 117
Phosphorus equilibrium in mature lactating goats, effect on (HART, STEENBOCK, and ELVEHJEM) 117

Lipase:
Enzyme (FALK, NOYES, and SUGIURA) 697
— (NOYES and FALK) 687

Lipoid:
Phosphorus in blood (WHITEHORN) 133
— — plasma (WHITEHORN) 133

Lysine:
Synthesis, availability of caproic acid derivatives (MCGINTY, LEWIS, and MARVEL) 75

M

Magnesium:
Blood plasma in renal disease (RABINOWITCH) 667

Metabolism:
Aromatic acids (CERECEDO and SHERWIN) 217
Basal, before, during, and after pregnancy (SANDIFORD and WHEELER) 329
Calcium, influence of chaulmoogra oil (READ) 515
Chaulmoogra oil (READ) 515, 541
Nitrogen, effects of anoxemia (BRUNQUIST, SCHNELLER, and LOEVENHART) 93
Tryptophane (ROBSON) 495
Yeast (BALLS and BROWN) 789
— (BROWN and BALLS) 823

Methemoglobin:
(CONANT and FIESER) 595
Cleavage products, determination in presence of (CONANT and FIESER) 623

Bz-3-Methyltryptophane:
Racemic, synthesis (ROBSON) 495

Muscle:
Tissue, effect on glucose (LUNDSGAARD and HOLBØLL) 453

N

Nitrogen:
Metabolism, effects of anoxemia (BRUNQUIST, SCHNELLER, and LOEVENHART) 93
Nucleic acid, plant (JONES and PERKINS) 557
Nitrogen—*continued:*
Partition, urinary, influence of hydnocarpates (READ) 541

Nucleic acid:
Plant, nitrogenous groups (JONES and PERKINS) 557

Nucleotides:
Plant, in animal tissue (JONES and PERKINS) 291

O

Octyl alcohol:
Secondary, substitution of hydroxyl group by halogen (MCKENZIE and TUDHOPE) 551

Osmosis:
Boric acid passage through skin (KAHLENBERG) 149

Oxygen:
Arterial blood (STEWART) 641
Venous blood, mixed (STEWART) 641

P

Pepsin:
Synthesis (WASTENEYS and BORSOOK) 15
—, effect of hydrogen ion concentration (WASTENEYS and BORSOOK) 675
—, — — temperature (BORSOOK and WASTENEYS) 633

Peptides:
Hydrolysis, rate, relation of chemical structure (LEVENE and SIMMS) 711

Phosphatides:
Plant (LEVENE and ROLF) 759
Phosphorus:
Equilibrium in mature lactating goats, effect of light (HART, STEENBOCK, and ELVEHJEM) 117
Lipoid, in blood (WHITEHORN) 133
—, — plasma (WHITEHORN) 133
Urine (YOUNGBURG and PUCHER) 31
Plasma:
Blood, albumin following injection of *Bacillus abortus* (HOWE and SANDERSON) 767
—, globulin following injection of *Bacillus abortus* (HOWE and SANDERSON) 767
—, in renal disease, calcium (RABINOWITCH) 667
—, — — —, magnesium (RABINOWITCH) 667
—, — — —, potassium (RABINOWITCH) 667
—, — — —, sodium (RABINOWITCH) 667
—, protein (HOWE and SANDERSON) 767
Lipoid phosphorus (WHITEHORN) 133
Potassium:
Blood plasma in renal disease (RABINOWITCH) 667
Pregnancy:
Basal metabolism before, during, and after (SANDIFORD and WHEELER) 329
Protein:
Alfalfa (CHIBNALL and NOLAN) 173
Blood plasma (HOWE and SANDERSON) 767
Cystine content (JONES, GERSDORFF, and MOELLER) 183
Enzyme synthesis (BORSOOK and WASTENEYS) 633
— — (WASTENEYS and BORSOOK) 15, 675
Fibroin of silk, distillation (JOHNSON and DASCHAVSKY) 197
Hydrolysates, fractional analysis (WASTENEYS and BORSOOK) 1
Tryptophane content (JONES, GERSDORFF, and MOELLER) 183
Zea mays (CHIBNALL and NOLAN) 179

R

Rachitis:
See Rickets.
Renal:
See Kidney.
Rickets:
Antirachitic properties imparted by ultra-violet irradiation to fluids and green vegetables (HESS and WEINSTOCK) 301
Calcification induced by radiant energy (STEENBOCK and NELSON) 209

XUM

S

Serum:
Iodometric method for determining sodium (KRAMER and GITTLEMAN) 353

Skin:
Boric acid passage by osmosis (KAHLENBERG) 149

Sodium:
Blood plasma in renal disease (RABINOWITCH) 667
Serum, iodometric method for determining (KRAMER and GITTLEMAN) 353

Sodium benzoate:
Ingestion, effect on blood (SWANSON) 565
—, — — urine (SWANSON) 565

Sodium chloride:
Blood uric acid level, influenced by (HARDING, ALLIN, and VAN WYCK) 61

Sucrose:
Hydrolysis by invertase from honey, influenced by fructose (NELSON and SOTTERY) 139
— — — — honey, influenced by glucose (NELSON and SOTTERY) 139

Sugar:
Blood (GILBERT and BOCK) 361
Excretion on various diets (GREENWALD, GROSS, and SAMET) 401
Glucose equivalent, comparison in different methods for determination of glucose (GREENWALD, SAMET, and GROSS) 397
Urine, diabetic, estimation with dinitrosalicylic acid (SUMNER) 287
—, normal (GREENWALD, GROSS, and SAMET) 401
—, — (GREENWALD, SAMET, and GROSS) 397

Sulfuric acid:
Butter fat, sulfuric acid reaction (SJÖRSLEV) 487
Vitamin A-containing butter fat, disappearance through action of oxidized fat (SJÖRSLEV) 487

Surface area:
Fetus (SANDIFORD) 323
Formulas, graphic comparison (SANDIFORD) 323

T

Thoracic duct:
Fat absorption through channels other than (ECKSTEIN) 737

Thyroxin:
(RABINOWITCH) 245

Tissue:
Animal, plant nucleotides (JONES and PERKINS) 291

Trypsin:
Ammonia liberation in tryptic digestion (HUNTER and SMITH) 649

Tryptophane:
Metabolism (Robson) 495
Proteins (Jones, Gersdorff, and Moeller) 183
Tyramine:
Tyrosine from silk, tyramine by decarboxylation (Johnson and Daschavsky) 725
Tyrosine:
Silk, tyramine by decarboxylation (Johnson and Daschavsky) 725

U

Uric acid:
Level, blood, influence of sodium chloride (Harding, Allin, and Van Wyck) 61
Urine:
Phosphorus (Youngburg and Pucher) 31
Sodium benzoate ingestion, effect of, on (Swanson) 565
Sugar in diabetic, estimation with dinitrosalicylic acid (Sumner) 287
— — normal (Greenwald, Gross, and Samet) 401
— — — (Greenwald, Samet, and Gross) 397

V

Vein:
Blood, mixed, carbon dioxide content (Stewart) 641
—, —, oxygen content (Stewart) 641
Vitamin A:
(Nelson and Steenbock) 575
Vitamin A—*continued:*
(Steenbock and Nelson) 209
(Steenbock, Nelson, and Black) 275
Butter fat, vitamin A-containing, disappearance of sulfuric acid reaction through action of oxidized fat (Sjörslev) 487
Fats, inactivating action on other fats (Fridericia) 471
Technique, modified, for determination (Steenbock, Nelson, and Black) 275
Vitamin B:
Jendrassik reaction (Levine) 157
Vitamin E:
(Dietary complex, reproductive) ethereal extracts of yellow corn, wheat embryo, and hemp-seed (Sure) 371

W

Walden inversion:
(McKenzie and Tudhope) 551
Wheat:
Nutritive value (Hart, Steenbock, Humphrey, and Hulce) 315

Y

Yeast:
Metabolism (Balls and Brown) 789
— (Brown and Balls) 823

Z

Zea mays:
Protein (Chibnall and Nolan) 179
